New Features and Benefits

NEW Simply brush to remove objects.

Make anything disappear in seconds with the new AI-powered Remove tool and the Object Removal Guided Edit.

POWERED BY AI

NEW Add realistic depth of field with precise control.

Choose your focal point and the new AI-powered Depth Blur filter automatically adds blur just where it's needed. Then adjust details like blur strength, focal distance, and focal range for the perfect look.

POWERED BY AI

NEW Change the color of any object.

Just use the automatic selection tools to choose what you want to change, pick your new color, and refine to suit your style.

NEW Seamlessly combine multiple pics.

Blend the subject from one, the background from another, and elements from many more to create a never-before-seen image.

NEW Create motion effects with four new Quick Actions.

With just one click, create a sense of camera motion or add animated sparkles, a blinking heart, or an animated frame.

NEW Create with modern textures and graphics.

Add a designer's touch with textured photo backgrounds and embellish creations, social images, and more with fun graphics.

NEW Be creative with the web companion app (beta).

Add moving overlays, change backgrounds automatically, adjust the look of your photos, share to social with QR codes, and more.

NEW Edit and create with the mobile companion app (beta).

Add fun pattern overlays. Use sliders to adjust light, color, and effects. Crop, straighten, and remove backgrounds with one-click Quick Actions. And more.

NEW Apple M3 chip support.

With full support for the new Apple M3 systems, you'll enjoy faster performance on Mac computers.
